Coming Soon!

The much talked about and highly anticipated…

IS

IS is what it **IS**

Auto-Dialer
PLC/RTU
Data Logger
Media Converter
Gate Way
Protocol Translator
Alarm Annunciator
MMI/HMI/OIT
WEB Host

IS is all the above and a whole lot more!

Preliminary

INTERFACE

SYSTEM

10.75 X 8.75 inches

Functions

- **Field Equipment Connectivity**
  Isolate, Condition, Convert
- **Process Signal Manipulation**
  Filter, Sample, Scale, Calculate
- **Control Scheme Implementation**
  Simulation and Runtime Control Algorithms
- **User Interaction**
  Visual, Audio, Voice, Touch
- **Data Gathering**
  Log, Archive
- **Process Analysis**
  Trend, Data Mine
- **Networking**
  Alert, Share, Report, Messaging

Features

- Touch Screen Interface
- Speaker / Microphone & Jacks
- Ethernet/USB/232/485 Comm Ports
- Cellular/WIFI/Bluetooth Capable
- Voice Annunciation and Recognition
- Multi-Level Security
- Solid State Hard drive
- Automatic System Integrity Verification

Applications

- Development Impact Analysis
- Site Remediation Monitoring
- Mandated Monitoring and Reporting
- Homeland Security
- Asset Management
- Water/Wastewater Management

Benefits

- Pre-Configured
- Self-Contained
- Simple to Install
- No Software Training Required
- 24/7 Free Technical Support
- 7 - Year Transferable Warranty

AGM Electronics

Solutions through Synergy

Overview

We have become an Information society, which through a variety of devices and accessories, have instant access to just about anything we want or need to know about. The **IS** brings that same accessibility to the world of Process Control.

Because the **IS** is based on and designed to seamlessly interface with current and future Information Networking and Interface technologies, you are "*ready to go*" when it comes to Interfacing with and Managing any Process Control System.
